

Written directions to locate seedling cages (to use with map showing these)

Cage 1: As you walk along the track through the bush on the south-west side of the Island, keep your eyes peeled for a gap in the canopy (a more open area). To the left of the track there is a cage and the pegs are slightly hidden in the trees.

Cage 2: As you walk down to the cave you will see a sack on the side of the track - you need to head 'off track' next to this sack and carefully make your way through the flax and hebes. The cage can be found under a large lemonwood (crush the leaves and smell citrus)

Cage 3 and 4: Opposite the beginning of the track down to the cave is an area with no understory plants. On this bank are two cages/non-caged spots.

Cage 5: Along the edge of the fence below the macrocarpa trees (you can stay on this side of the fence).

Cage 6: On the bank below the Married Quarters, be careful not to stand *in* the non-caged plot.
